

Feature for Feature, the best unitizing system...

THE FANTOM™ FULL WEB

If you are a comparative buyer, and who isn't, you want facts—just the facts! At HIGHLIGHT INDUSTRIES we believe once you understand the facts you will agree the FANTOM FULL WEB is your best buy.

USER FRIENDLY

From the ADJUSTABLE HEIGHT STEERING with COMFORTABLE FOAM GRIPS, down to the four SWIVEL CASTOR BASE, it is clear that the Fantom was designed by people who care about the people who work.

"STRETCH SET™", our patent-pending film tensioning system, combined with our two stage brake system insures the film stretch to be precisely controlled. This maximizes your package strength and film economy. The two stage brake system allows the brake to be switched OFF for easy

2 stage brake for easy "ON/OFF" control

FANTOM FULL WEB

Top head assembly is adjustable to any size roll

"STRETCH SET" for full range film stretch

film attachment to the pallet load. Once attached the brake is switched ON to the pre-set tension. This gives the operator full control of the film stretch. Portability and Manueverability are Fantom's two easily recognized features. The Fantom saves time by going to the load and quickly wrapping it up. It allows you to have a wrapping station at any location in your plant.

MULTIPLE MODE DESIGN

MODEL FW-72 72" roll capacity

MODEL FW-60 60" roll capacity

Comfortable foam steering handles

MULTIPLE MODE DESIGN

It is like owning SEVERAL units! The Fantom will accommodate film rolls from 10" to 70" and can be positioned at any height. This gives you the flexibility to top wrap, fully wrap, or wrap to any desired configuration you choose. All this without buying any optional parts!

A FANTOM FEATURE THAT IS HARD TO IGNORE

SAVING MONEY! For starters Fantom portability saves time. It is 90% faster than some banding systems. Fantom also saves you in the following ways:

- STRETCH SET™ saves film and increases product security
- One Fantom will wrap in many locations within your plant
- It improves use of warehouse space
- The SELF-LOCKING TOP CORE prevents film roll damage

Bottom film holder adjusts up/down for correct film positioning

High strength structural steel frame

4 heavy duty castors increase stability and balance

PERFORMANCE AND DURABILITY...
