

From small rolls to large rolls, the Highlight Horizontal Roll Wrapper can handle them all!

Film Assist temporarily energizes the power pre-stretch system so the operator can easily pull film down to the load.

Film knife automatically scores film for final tear-off from product at end of cycle.

Integrated Master Control touch screen provides superior control over all machine functions. Shown is only one of the many screens used in the operation of the Highlight Horizontal Roll Wrapper. Help messages for all machine functions are always available to the operator.
