

Highlight Synergy Roll Wrapper for Small Applications

A stretch wrap machine exclusively designed for the unique requirements of the small roll products industry!

The custom-designed Synergy Roll Wrapper for small applications will quickly and economically apply stretch film to your roll products, providing protection and total encapsulation. This will allow you to reduce or eliminate your costly current packaging method while providing both a user- and environmentally-friendly solution.

Stretch wrap benefits include:

- ☺ Reduction in packaging time and labor cost
- ☺ Product cleanliness and limited weather protection
- ☺ Easy product identification
- ☺ Reduction in corrugated and Kraft paper packaging storage
- ☺ A dramatic decrease in packaging costs!

Hydro-Stretch® provides infinite control over the stretch film.

The Control Panel makes using the Synergy Roll Wrapper for Small Applications a breeze!

In addition to the machine shown, Highlight custom designs spiral overhead, horizontal and face roll wrapping machines. Highlight Industries is also a leader in the semi-automatic / automatic pallet wrap and stretch bundling machine industry.
