

**FOR THE GREATEST LOAD
HOLDING STRENGTH**

SYNERGY 2

With Dual Hydro-Stretch®

Strength, Speed, Savings

The Synergy 2 with Dual Hydro-Stretch® delivers more load-holding strength than any other stretch wrap system available! The fast 12 RPM turntable wraps your loads quickly. The Allen-Bradley PLC with three unique wrapping patterns insures reliability and flexibility. The Synergy 2 is the most advanced system in its class, delivering more load-holding strength, speed and savings.

- **Dual Hydro-Stretch®**, a feature exclusive to Highlight Industries, provides two independent levels of stretch: one for the bottom of the load, the other for the rest of the load. Over 70% of film breaks occur at the bottom of the load where the load and pallet meet. Dual Hydro-Stretch® allows you to set the stretch level at the bottom of the load *independent* of the stretch level on the rest of the load. This allows loads to be wrapped tighter at higher stretch levels and at lower costs.
- **Highlight Heavy Duty** is the design of the Synergy 2. Its durable, heavy duty turntable has a 3/4 HP DC motor with soft start and adjustable speed from 0-12 RPM.
- **Built for the Future**, state-of-the-art controls are easy to use, and offer flexibility with 3 built-in wrapping patterns.

Fast 12 RPM
Low Profile 5000 lb. capacity shown
High Profile 4000 lb. capacity also available
